Project Details

Topic: “Indian Card Payment Analysis”

Our project leverages Machine Learning within the Django framework to seamlessly connect multiple webpages. Through predictive analytics and graphical representation, users gain valuable insights to make informed decisions when choosing the most suitable bank for their investments.

Topic: “Time Tracker Tool”

This Project is based on Employee day to day attendance so Admin can able to track the employee attendance based on their working hours

Extra – curricular activities

- Got High Five – Team Award for working on the time report tool
- 1st Runner-up in Persistent Annual Technothon for Gems Hi-tech BU
- Won inter-college “Football Tournament” at college level
- Participated in logo quiz competition at SCOE, Pune
